

Orbital Tube Forming System

HVAC

Refrigeration

- Cut
- End Form
- Bend

Our forming systems pull from a level wound spool, straighten, cut, end form, and bend with precision – this ***all-in-one compact footprint, saves you valuable manufacturing space.*** Winton's software allows your operator to bypass any of the operations as needed to meet your specific production requirements.

Further Reduce Your Labor and Material Costs with these optional add-ons:

- 3D Simulation and Collision detection Software.
- 3D STEP File Conversion and Batch Programming Software.
- Add a Drill Station or End Former to Eliminate Existing Secondary Operations.
- Choose from a Large Variety of Powered and Non-powered Payoffs.
- Save Change Over Time with a Multi-Spindled Payoff.
